Product Performance

City	Orders	Revenue
Bangalore	490	338063
Chennai	532	360443
Coimbatore	532	354011
Delhi	513	347025
Hyderabad	472	307217
Kochi	484	324122
Kolkata	484	327439
Mumbai	498	325388
Mysore	478	308526
Pune	517	359906

Key Findings

1. **High order volume:** The dataset contains **5,000 orders**, showing a substantial level of customer engagement.
2. **Strong revenue generation:** Total revenue is **₹33,52,140**, with an average order value of approximately ₹6,704.
3. **Product and city performance varies:** Sales are not evenly distributed across products and cities, indicating opportunities for targeted marketing.

Suggestions

1. **Focus on top-performing products:** Promote the products generating the highest revenue to maximize sales.
2. **Improve low-performing cities:** Analyze cities with lower order volume and revenue to identify growth opportunities.
3. **Increase average order value:** Use bundles, cross-selling, and quantity-based discounts to encourage higher spending per order.
